ANNOUNCEMENT.

The Business of the Barlow Mfg. Co. was established more than ten years ago. Some of its most practical designs were patented in 1890, since which date there have been added, every year, novelties and necessities for practical window dressing and attractive store display.

The Management of the Company was changed at the beginning of 1900, incorporation was taken under Massachusetts laws, and the business reorganized with greatly increased facilities.

The New Factory in which we are now located is one of the largest, most conveniently arranged and best lighted of its kind in the country. It is most completely equipped with modern high grade machinery, finest tools and a polishing, plating and finishing department that cannot be surpassed for the quality of its work.

First Class Workmen only are employed, thoroughly experienced in work of this character. We have a system of inspection which insures customers that they will receive only perfect fixtures and highest finish.

We Invite the most critical examination of the goods we offer and shall be pleased to have our salesmen submit samples for this purpose or to receive your calls at our sales-rooms, office or works.

Our Policy is to make only first class goods, from the best materials, of the finest workmanship and finish, practical and substantial in design and to sell them as low as similar goods are offered.

Our Guarantees are plainly stated and will be fulfilled.

We thank you for the generous patronage we have enjoyed in the past and assure you of our intention to merit all your orders in the future.

Yours respectfully,

BARLOW MANUFACTURING CO.

Holyoke, Mass., July 31, 1900.

DISPLAY FIXTURES.

We consider it necessary to say but a word about the necessity of metal display fixtures in the modern store. Where can you find one that does not have them? Some stores have more and better equipment than others. Some window decorators have a faculty of making beautiful displays with a few well selected fixtures. Other dressers need a greater assortment, but none to-day think of attempting to do without some practical metal frames and stands.

Our experience covers a period of about a dozen years, not so long as to be encumbered with antiquated ideas or old fashioned, impractical designs and yet long and varied enough to give us confidence in the assertion that we have a complete line of everything that the artistic window decorator can require, and of a character that will help him to produce in the least time the most elaborate effects he can desire.

Simplicity and beauty of design, accuracy and care in workmanship, strength and adjustability and above all absolute INTERCHANGEABILITY of the parts of our fixtures are important considerations that must not be overlooked. By INTERCHANGEABLE we mean that standards, slides, brackets, arms, etc. of the same sizes are all made with the same sized holes, plugs or threads (by special tools) and MAY BE CHANGED FROM ONE FIXTURE TO ANOTHER with certainty that they will fit.

It is hardly possible in a catalogue to show or describe all the fixtures we have to offer. We have shown those most commonly used, together with others adapted for special service or peculiar conditions. We make a great many not shown in these pages, and will cheerfully furnish specifications, sketches and prices on receipt of plans with dimensions and information. We are constantly adding new designs and stands suited to the display of the novelties of each season. If you do not find what you want in these pages please write us.

Nickel Finish is unquestionably the best adapted for general use although Brass and the various special and fancy finishes may frequently be desirable to preserve harmony with furniture and surroundings, or because of the preference and taste of the purchaser. We are prepared to supply any finish required by customers and will on special orders match finish of other fittings of the store if samples of coloring are submitted. The Finest Nickel Finish is secured only by great care, perfect equipment, choice materials and above all experience in its production.

The two most important qualities of good plating are:—1st. Fineness of quality and surface so that a high polish will be taken. 2nd. Hardness so that the high finish will be retained and the surface not easily scratched. Given these two, with the brilliancy of the white nickel, and nothing is so well adapted to the display of merchandise.

The care of fixtures is a matter which must not be neglected. All of our work is thoroughly inspected and only perfectly fitted and finished fixtures pass the inspectors. When put into use a certain amount of systematic care is necessary to keep them clean, bright and in good order. Scratches, dents and breakage will occur, but we can generally supply parts of our goods to repair these defects and customers may thus at slight expense keep their equipment in first class condition, if attended to systematically.

Brass or any lacquered finish should not be rubbed with any polishing composition but may be wiped lightly with a dry cloth.

Nickel Fixtures should receive regular care. Frequent wiping and cleaning will preserve the lustre and beauty of finish for years.

GENERAL COMMENTS.

Specifications:—Please notice that throughout these pages complete specifications are given of the sizes, lengths, etc. of the different members comprising the fixtures offered. This will enable you to make comparison with fixtures already in use and to be sure of just what you are purchasing.

Bases:—The stability of a fixture is one of its most important features. All our bases have been designed after years of experience and are heavy enough to stand squarely and hold any amount of the kind of trimming for which the fixture is recommended. Our plain bases have thick spun brass shells covering heavy cast iron. On the larger sizes the two parts are shipped separately (for greater convenience in handling). The shells of the smaller sizes are bound on the underside and enclose the iron.

The fancy Brass Bases of all patterns are heavy castings, nicely finished and from original and ornamental designs.

The Cast Brass Scroll Base is from an entirely new design, very substantial and highly ornamental and artistic. The legs are so set into the hub that they cannot become loose or out of shape.

The Porcelain Bases are of finest quality with gold bands and with ornamental brass button into which standard is screwed.

Standards:—Are of Plain or Fancy tubing. We use a heavy rope pattern for all fancy standards, which for tall fixtures is reinforced by the insertion of iron pipe to secure the needed stiffness. All plain standards $\frac{3}{8}$ in. and larger diameter are of steel lined brass tubing, very stiff and strong and held in base or flange by set screw. Standards smaller than $\frac{3}{8}$ inch are of heavy brazed brass tubing, threaded on the end to screw into the base or flange. Where both kinds are offered, plain will be sent unless order specifies rope.

Brackets:—For wall and for standards are made of plain or rope tubing. The latter is very ornamental and highly satisfactory. In ordering care should be taken always to specify which is wanted, otherwise plain will be sent.

Assorted Heights and Sizes. In many cases fixtures are made in a number of heights and customer is entitled to make selection, but where no preference is stated we will send the assortment listed.

Orders should be plainly written, stating the quantity wanted, using the fixture number, and when choice is offered of plain or rope tubing, of height or length (as of standards, arms or brackets) specify which is desired.

Finish should also be stated, but where no preference is expressed Nickel will always be sent.

Shipment of goods will be made as promptly as possible after receipt of orders. Customers will confer a favor by stating how soon goods are required. Orders under 50 lbs. will be sent by express unless instructed otherwise.

Packing of goods will be done in a neat and orderly manner, with all reasonable care. Parts of fixtures will be detached and wrapped separately, thus making much more compact packages and decreasing cost of transportation. No charge for packing or cartage. Our responsibility ceases when delivered to the carrier. Claims for shortage, etc. must be made immediately upon receipt of goods.

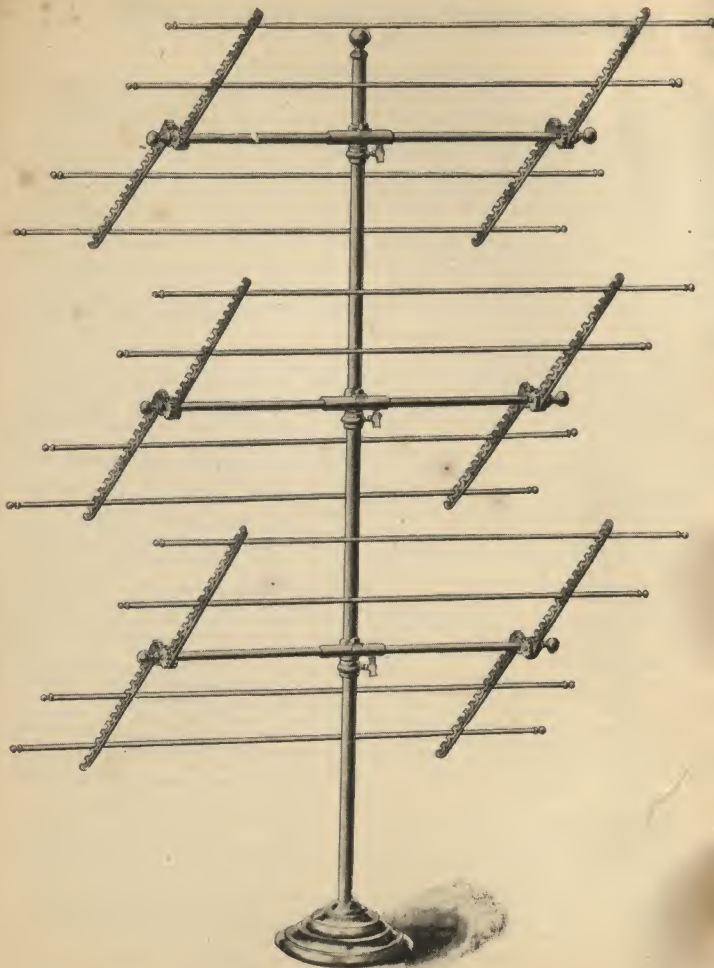

Terms. All bills are due upon receipt of goods. Bills overdue are subject to sight draft without notice.

Discounts. Most of the prices given herein are subject to discount. If you will send list of fixtures you wish to consider we will send you special prices and you can make your selection.

Finish. Prices quoted are for finest Nickel Finish, or polished and lacquered Brass. We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass when desired at an additional cost of 10 per cent. In all cases Nickel will be sent unless otherwise ordered.

We Guarantee All of our fixtures to be strong and stiff enough to do the work for which they are designed and recommended.

We will replace without charge any parts which prove defective in material, workmanship or finish.

(Patented Sept 23, 1890. Feb. 18, 1896).

No. 12.—Barlow Patent Window Fixture.

Three Sections. Rods four feet long. Each Section set same angle.

The Barlow Patent Window Fixture

Has no Equal.

There is not another fixture which possesses the wide range of adjustment to be found in this.

There is not another which has the stability of this, when loaded with a fine display of either light or heavy goods.

No other fixture can be adjusted and trimmed with such a variety of arrangement in such short time. The advantage of the single standard and combined sections cannot be too strongly stated.

The adjustment is practically instantaneous. No time is wasted leveling up, raising on one standard, lowering the other, and other maneuvers necessary with the ordinary double standard frames, are not required with this. Windows can be trimmed in half the time when our Nos. 9 or 12 are used.

Important features of the Barlow Patent are:—

1st. The single standard and base, increasing the convenience of its uses.

2nd. The separate revolving sections, consisting of two pairs of notched ratchet arms with cross rods. Each section may be swung around the standard independently of the others, so as to face in any direction; a single thumb screw controlling this adjustment.

3rd. The sidewise sliding movement of each section. The long sleeve through which the supporting bar passes gives sufficient bearing so that frame may be at the extreme end of bar. By this arrangement the fixture is capable of being spread so as to trim a window 12 feet wide.

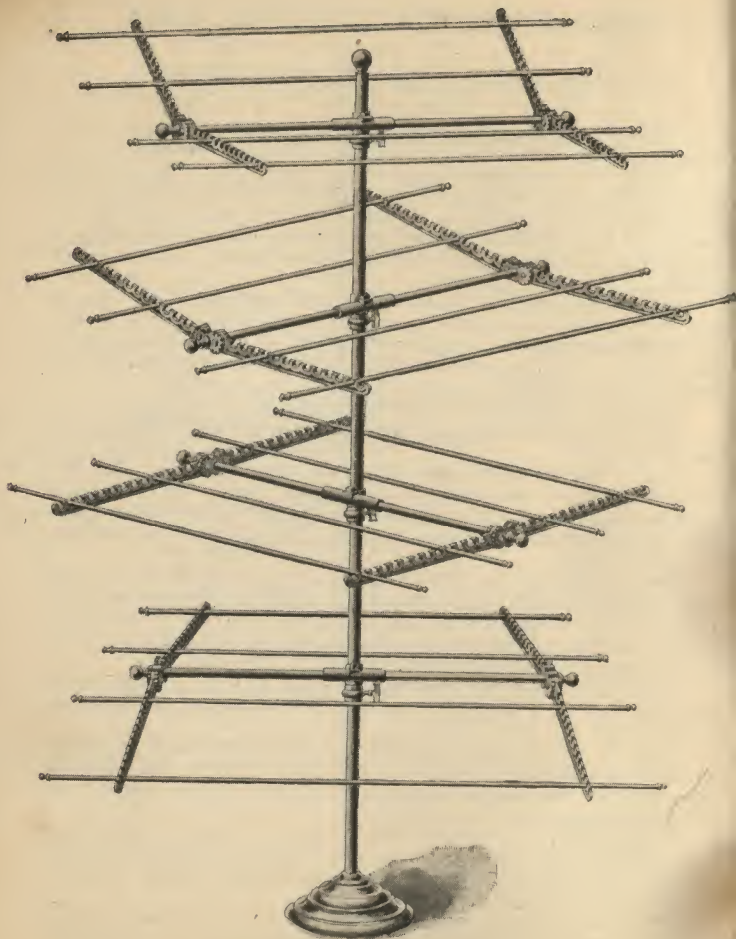

4th. The angular adjustment of each section, AS A WHOLE, is controlled by a single screw, by it, frame may be set level or at any angle.

5th. Separate angular adjustment of EACH HALF OF A SECTION is also provided for the ratchet arms. Each pair of arms may be set at any angle, an important feature where many varieties of goods are to be displayed.

6th. The Vertical adjustment of each section by which four ratchet arms with their rods may be raised or lowered on the standard, by adjustment of a single large thumb screw, without disturbing the goods displayed.

This fixture has been in constant use by some of our customers for several years, who claim that they need never arrange it twice alike in the same window.

See pages 6, 8 and 9 for cuts and prices.

(Patented Sept. 23, 1890; Feb. 18, 1896.)

No. 9.—Barlow Patent Window Fixture.

Four Sections, showing how Frames may be set to face any approach and at any angle.

The Barlow Patent Window Section Fixture.

Is the most practical and complete fixture ever designed. It has a variety of adjustments which give it a wide range of use and at the same time it is not liable to get out of order and will stand firmly when adjusted.

This fixture is very largely used in Gents' Furnishing Goods, Clothing, Dry Goods, Department and General Stores.

DESCRIPTION.

BASE,	13 inches diameter.	
STANDARD,	1½ " "	
SUPPORTING BARS,	¾ inch " "	Steel Rod.
NOTCHED RATCHET ARMS,	17 inches long.	
RODS,	½ inch diameter tubing.	

No. 12,	3 Sections,	7 ft. high,	4 ft. Rods.	Price, \$42.00.
" 12,	3 "	7 "	6 "	" 45.00.
" 9,	4 "	8 "	4 "	" 50.00.
" 9,	4 "	8 "	6 "	" 54.00.

For windows requiring fixture higher or lower than stated or with rods other than 4 or 6 feet prices will be quoted upon application.

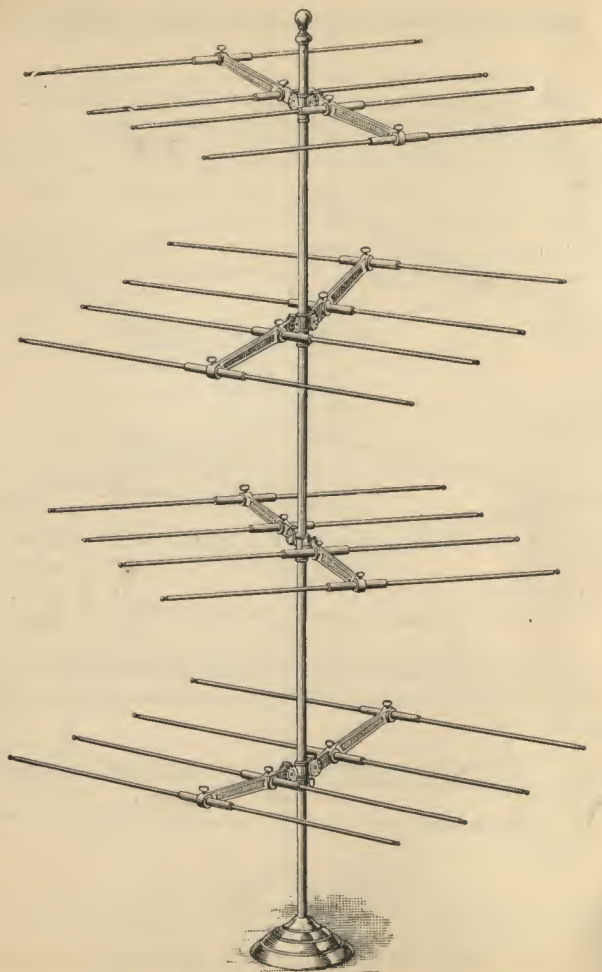

In ordering state number of sections and length of rods desired.

See pages 6 and 7 for further descriptions.

WE GUARANTEE

All of our fixtures to be strong and stiff enough to do the work for which they are designed and recommended.

We will replace without charge any parts which prove defective in material, workmanship or finish.

No. 116.—Single Standard Frame.

No. 116.—Single Standard Frame.

Four rods in each section 4 feet long. Each section may be raised or lowered independently of the others, also turned so that one section of display may be made to face the front window and the next above or below, to face side window. Our patent Ratchet Arm allows each pair of rods to be placed at the same or different angles. This fixture is particularly adapted to corner windows where a display in two directions is wanted. This is the most satisfactory low priced fixture of its kind on the market.

BASE,	11 inches diameter.
STANDARD,	$\frac{7}{8}$ inch “
RATCHET ARMS,	12 inches long.
RODS,	$\frac{1}{2}$ inch diameter.

No. 116, 3 Sections, 6 ft. high, 4 ft. Rods, **Price \$20.00.**

“	“	3	“	7	“	“	4	“	“	“	20.50.
“	“	4	“	8	“	“	4	“	“	“	26.00.

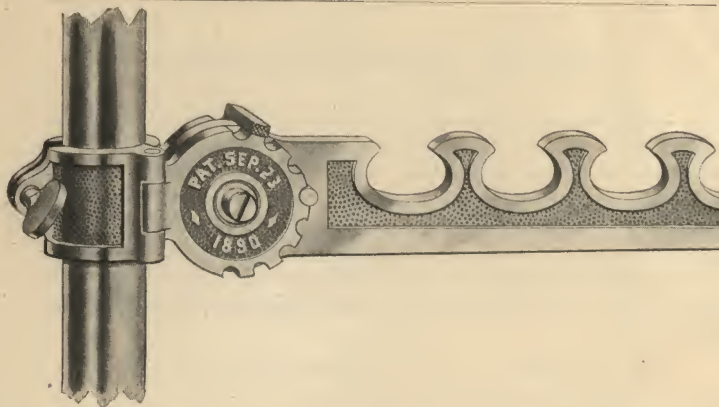

In ordering state height and number of sections desired.

NOTE.—Prices quoted are for finest Nickel Finish or Polished and Lacquered Brass.

We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass when desired at an additional cost of 10 per cent.

In all cases Nickel will be sent unless otherwise ordered.

Write for Discounts.

No. 3.—Barlow Patent Notched Ratchet Arm.

With Safety Lock Attachment.

(Patented Sept. 23, 1890.)

The Ratchet Arm plays an important part in a large number of fixtures and upon the strength and utility of this device the whole fixture depends.

The Barlow Patent Ratchet has now been favorably known to the trade for ten years and continued use has demonstrated its superiority.

It is strong.

It is simple.

It will not get out of order.

It can be adjusted with one hand.

It has no springs or light parts to become broken.

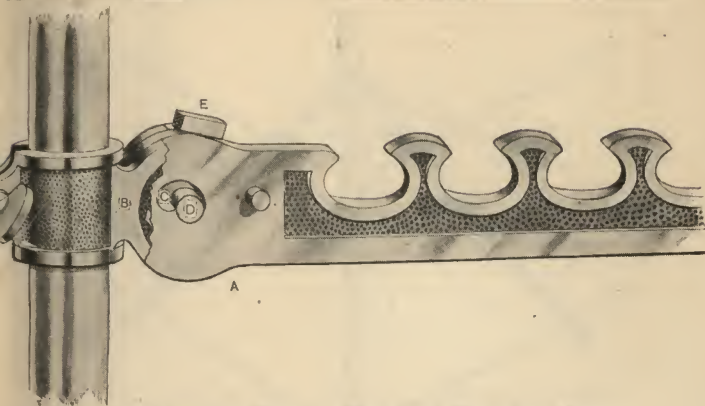

It cannot be knocked out of place when once adjusted.

It is made of tough bronze and will keep its shape.

If so ordered the collar is hinged so it may be placed upon or removed from standard at any point instead of sliding over end.

Each notch is accurately machined to size of rod it is to carry, so that rods lie snugly when placed. All notches are made for $\frac{1}{2}$ inch rods unless otherwise ordered.

Notched Ratchet Arms are made in several lengths and with various number of notches. See pages 14 and 15 for sizes and prices.

No. 2.—Barlow Patent Notched Ratchet Arm. Sectional View.

(Patented Sept. 23, 1890.)

The above cut shows the working parts of our ratchet arm.

A represents the Arm: B represents the Standard and Sleeve with section of the Ratchet, deeply slotted to receive arm:

C is eccentric hole in Arm, which with D forms the bearing:

E is safety lock (a screw with an oblong head).

Cut 2 shows bracket unlocked; Cut 3, locked.

The use of this safety lock is a convenience and safeguard, **not a necessity**. On all other known ratchets there is always danger of knocking arms out of place while dressing window or when getting out of window after it is dressed.

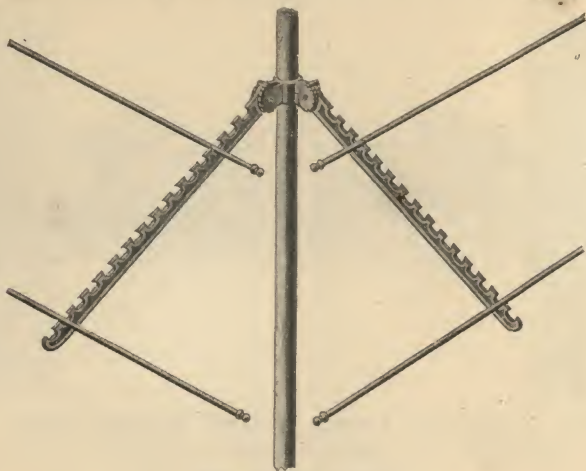

By the use of the Barlow safety lock no such catastrophe can occur, but if the lock is not used the Arm has all the firmness and stability of other styles offered and no added complication.

We will send a sample Arm to any intending purchaser in the United States for examination and trial. Practical demonstration of merit is convincing.

Note.—Prices quoted are for Finest Nickel Finish or Polished and Lacquered Brass.

We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass when desired at an additional cost of 10 per cent.

In all cases Nickel will be sent unless otherwise ordered.

(Patented Sept. 23, 1890.)

No. 4. Barlow Patent Angle Ratchet Arms.

No. 4. Corners of windows may be nicely fitted with the above. Long or short arms may be used, to suit the shape of window and ideas of owner. A set of standards and ratchets for each corner with three or more sections and the necessary amount of rods will make an inexpensive but very complete window fixture, especially when supplemented by a wise assortment of stands for the bottom.

No. 5. The Triple Ratchet Arm shown on next page, may be used in corner of window, at back or in any place where a semi-circular display is desired. Notched Ratchet Arms are made in various lengths and may be selected to fit the space at command.

No. 1. The Double Notched Ratchet Arm has two arms, in line, each extending on opposite sides of the standard as shown in Cut No. 109 on page 18.

Remember that all the Barlow Ratchet Arms are fitted to Hinged Collars, so that they can be put on and taken off Standards quickly and without disturbing Standards.

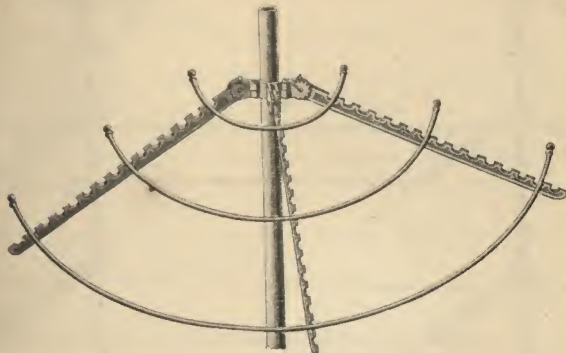

Notched Ratchet Arms are made in several lengths as follows:—

5 Notches, length from Standard to Tip, 8 inches.

8	"	"	"	"	"	12½	"
13	"	"	"	"	"	17	"
19	"	"	"	"	"	24	"

NOTE;—We always send 13 Notch Arms unless otherwise ordered.
The Arms always have notches to hold $\frac{1}{8}$ inch rods unless otherwise ordered,

For full explanation and price of Ratchet and Arms see pages 12, 13 and 15.

(Patented Sept. 23, 1890.)

No. 5-Barlow Patent Triple Notched Ratchet Arms.

Description and Prices of Notched Ratchet Arms.
Standards, Rods, Braces and Bases.

NOTCHED Ratchet Arms. Single Double, Triple or Angle.

Price \$1.50 per Arm.

ARMS 17 inches long and for $\frac{1}{2}$ inch rods and $\frac{7}{8}$ inch standards will be sent unless otherwise ordered. See page 14 for lengths and number of notches.

STANDARDS. We use heavy steel lined, brazed brass tubing which combines strength and stiffness with accuracy and high finish. All Notched Arms are made for $\frac{7}{8}$ inch standards. STANDARD, $\frac{7}{8}$ inch diameter.

Price \$.30 per foot or fraction.

FLANGES, for Floor or Ceiling. For $\frac{7}{8}$ Standards, Price \$.40 Each.

BRACES vary in cost, depending upon their length, and whether adjustable or plain. The following prices are for braces for $\frac{7}{8}$ inch diameter standards, in even inches to 12 inches. (Prices on longer braces on application.)

Plain Braces 12 inches or shorter. Price \$.50 Each.

Extensible braces 12 inches Exten. to 22, or shorter, Price \$.75 Each.

BASES have a heavy cast iron body with thick brass removable shell. They are drilled for $\frac{7}{8}$ inch Standards.

Base, 9 inches diameter, Price \$1.50 Each.

"	11	"	"	"	"	\$2.00	"
"	13	"	"	"	"	\$3.00	"

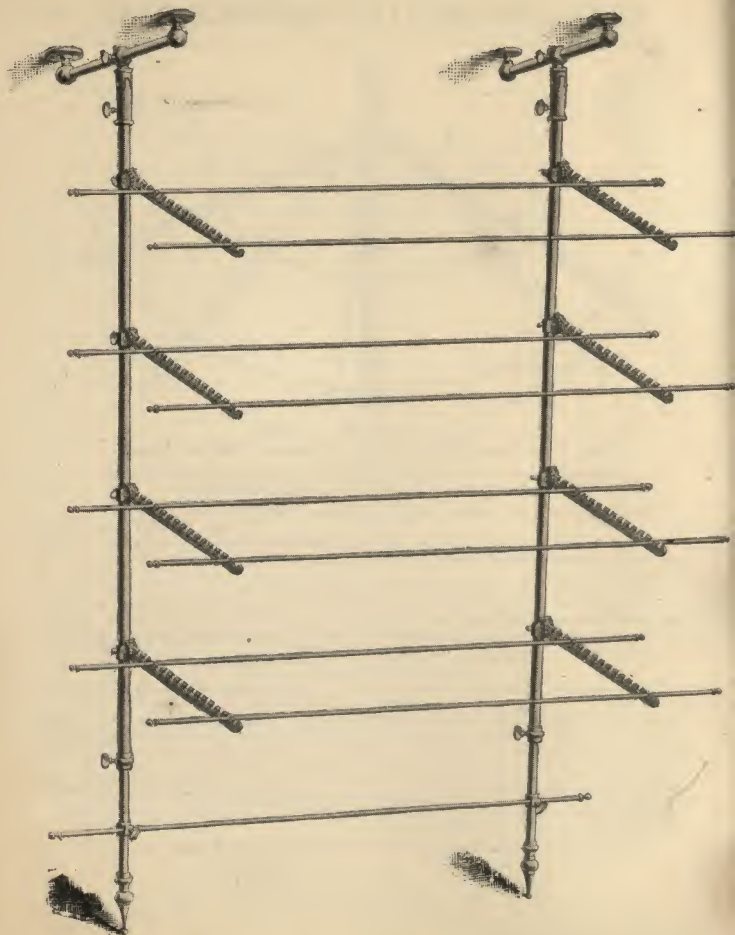

RODS are of heavy steel lined brazed brass tubing. They are highly finished and ends have solid ball ornaments. Price of rods cut to any length including end ornaments.

Rods $\frac{1}{2}$ inch diameter \$.12 per foot or fraction.

" $\frac{5}{8}$ " " \$.17 " " " "

ROD CLAMPS, to hold rod in notched arm and prevent it from turning, nicely finished, No. 425 Rod Clamp, Price \$2.50 per Dozen.

Prices will be promptly furnished for fixtures desired upon receipt of request with sketches and dimensions,

No. 8.—Window Frame Suspended from Ceiling.

No. 8. Frame Suspended from Ceiling.

Fixture may be placed at front or back of window, and at any desired angle. Standards slide on ceiling tracks, are hinged at the top and have telescope tubes at the bottom, with extension to rest on floor. Tie rod at bottom keeps fixture rigid when placed.

Fixture is equipped with our Patent Ratchet Arm. (See pages 12 and 13 for full description.)

TRACK, $\frac{7}{8}$ inch diameter tubing, 3 feet long.

STANDARD, $\frac{7}{8}$ inch diameter tubing, length as ordered.

RATCHET ARMS, 13 notches, 17 inches long.

RODS, $\frac{1}{2}$ inch diameter, length as ordered.

No. 8.	Price with 8 ft. Standards,	6 ft. Rods,	\$33.00.
"	" 10 "	" 6 "	34.00.
"	" 12 "	" 6 "	35.00.

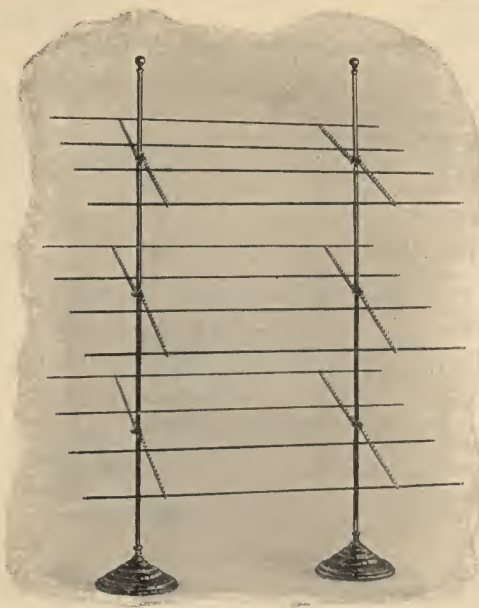

Prices above are for frame with four sections. If a greater or less number of sections, or longer or shorter rods are wanted prices will be sent on receipt of request.

NOTE:—Prices quoted are for Finest Nickel Finish or Polished and Lacquered Brass.

We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass when desired at an additional cost of 10 per cent.

In all cases Nickel will be sent unless otherwise ordered.

Write for Discounts.

Nos. 109—358—110 and 357 are perhaps the best known and most used of any of the Window Frames. All these Barlow Frames have the advantage of portability and easy adjustment. They can be quickly set up and taken down, and if temporarily not required they can be stored in a very small space, as all the rods, arms and standards require but little room except for their length.

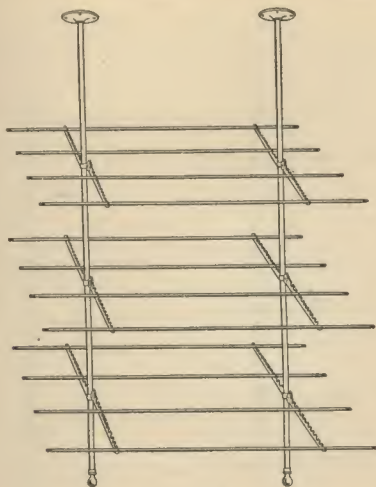

No 109 is especially adapted to deep windows, having Double Ratchet Arms which carry two rods each side of standards. The Ratchet Arms may be raised or lowered on standards and set at any angle.

No. 109.

BASES, 11 inches diameter. STANDARDS, $7\frac{1}{8}$ inch diameter.
NOTCHED ARMS, 17 inches long on each side of Standard.
RODS, $\frac{1}{2}$ inch diameter.

No. 109,	4	Sections,	7	ft. 6	in. high,	6	ft. Rods,	\$42.00.	
"	4	"	7	"	6	"	4	"	38 00.
"	3	"	7	"	"	"	6	"	35.00.
"	3	"	7	"	"	"	4	"	32.00.

When customers desire No. 109 with Flanges to screw to floor, instead of with heavy, portable bases shown in cut, they will be furnished at prices \$2.00 less than the above figures.

No. 358.

Fixture suspended from ceiling. Same as No. 109 (see opposite page) except it has two heavy ceiling flanges in place of the portable bases.

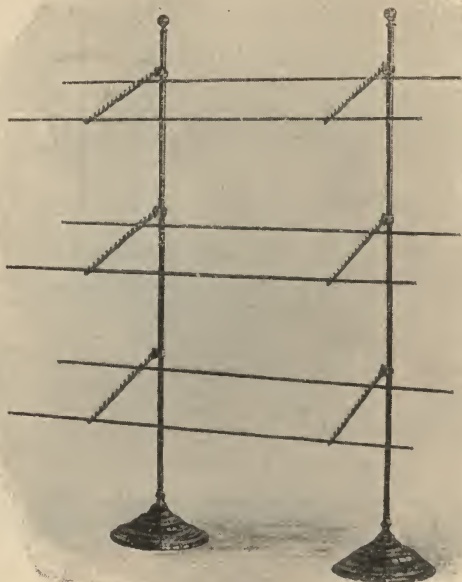

No. 358,	4	Sections,	7	ft. 6	in. high,	6	ft. Rods,	\$40.00.
"	4	"	7	" 6	"	"	4	" " 36.00.
"	3	"	7	" 6	"	"	6	" " 33.00.
"	3	"	7	" 6	"	"	4	" " 30.00.

See pages 12 and 13 for description of Patent Ratchet Arm.

Note.—All prices quoted are for Finest Nickel Finish, or for Polished and Lacquered Brass.

We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass when desired, at an additional cost of 10 per cent.

In all cases Nickel Finish will be sent unless otherwise ordered.

No. 110 is especially adapted to shallow windows, being equipped with single Ratchet Arms. This fixture has very heavy bases, making the use of braces at the top unnecessary.

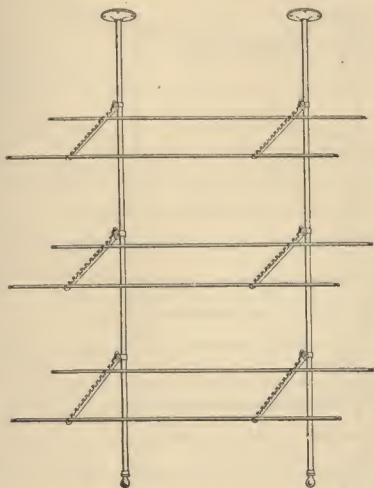

BASES, 13 inches diameter. STANDARDS, $\frac{7}{8}$ inch diameter.
NOTCHED ARMS, 17 inches long. RODS, $\frac{1}{2}$ inch diameter.

No. 110.	4	Sections,	7	ft. 6	in. high,	6	ft. Rods,	\$30.00.
"	4	"	7	"	6	"	4	28.00.
"	3	"	7	"	"	"	6	24.50.
"	3	"	7	"	"	"	4	23.00.

When it is desirable to place standards as close to back of window as possible we furnish braces to steady standard at the top and flanges to screw to floor instead of the heavy bases, making the prices \$4.00 less than the above figures.

See pages 12 and 13 for description of our Patent Ratchet Arms.

For very shallow windows or for use at the back of window only, our twelve inch ratchet arm will be found serviceable and would be furnished at same prices as above.

No. 357.

Fixture suspended from ceiling by two heavy flanges. By suspending fixtures in this way greater opportunity is given for floor display, which is oftentimes advisable.

STANDARDS, $\frac{7}{8}$ inch diameter.

RODS, $\frac{1}{2}$ " "

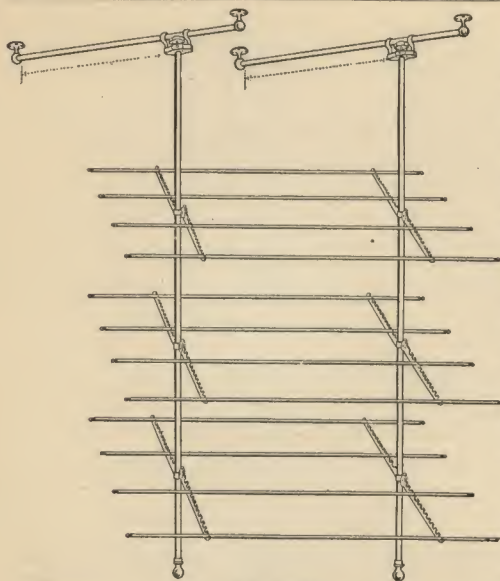

NOTCHED ARMS, 17 inches.

NOTE:—Prices quoted are for finest Nickel Finish, or Polished and Lacquered Brass.

We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass when desired, at an additional cost of 10 per cent.

In all cases Nickel will be sent unless otherwise ordered

No. 359.

This fixture is equipped with the Barlow Patent Ratchet Arm. For full description of Arm see pages 12 and 13.

In this fixture the important features are:—

Its adjustment without turning standards (the internal rods do the work.)

The trim need not be disturbed and the operator does all the work from the floor.

The hook is of such shape that when desired the entire fixture may be removed from the tracks leaving window clear, this too can be done from the floor.

This fixture being suspended from the ceiling the free use of the bottom of window is given for the display of goods.

TRACKS, $\frac{3}{8}$ inch diameter 3 feet long.

STANDARDS, $\frac{3}{8}$ " " "

RODS, $\frac{1}{2}$ " " "

DOUBLE NOTCHED RATCHET ARMS, 35 inch spread.

Prices, STANDARDS	8 feet long,	RODS 6 feet long,	4 Sections,	\$48.00.
"	8 " " "	4 " " "	4 " "	44.00.
"	8 " " "	6 " " "	3 " "	42.00.
"	8 " " "	4 " " "	3 " "	39.00.

This Fixture consists of two hooks by which the two standards are suspended from tracks, attached to ceiling.

The hooks are also clamps which are operated by an internal rod through the standards, attached to ball ornaments at the bottom.

When it is desired to move the standards the balls at the bottom are turned. clamps are thereby loosened and standards may be moved to desired location.

To tighten and make fixture rigid in new location, turn balls and clamps tighten on tracks.

Swing Arm Tree

Suspended from Track
Attached to Ceiling.

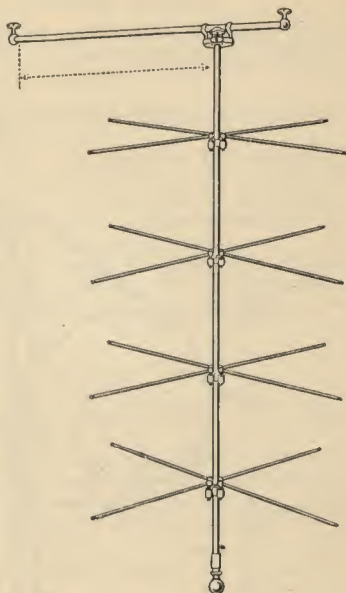

Equipped with our Adjustable Clamp as described on opposite page.

TRACK, $\frac{7}{8}$ in. dia., 3 ft. long.

STANDARD, $\frac{7}{8}$ in. dia.,
8 ft. long.

SWING ARMS, $\frac{1}{2}$ in. dia.,
18 in. long.

No. 361, Price \$20.00 each.

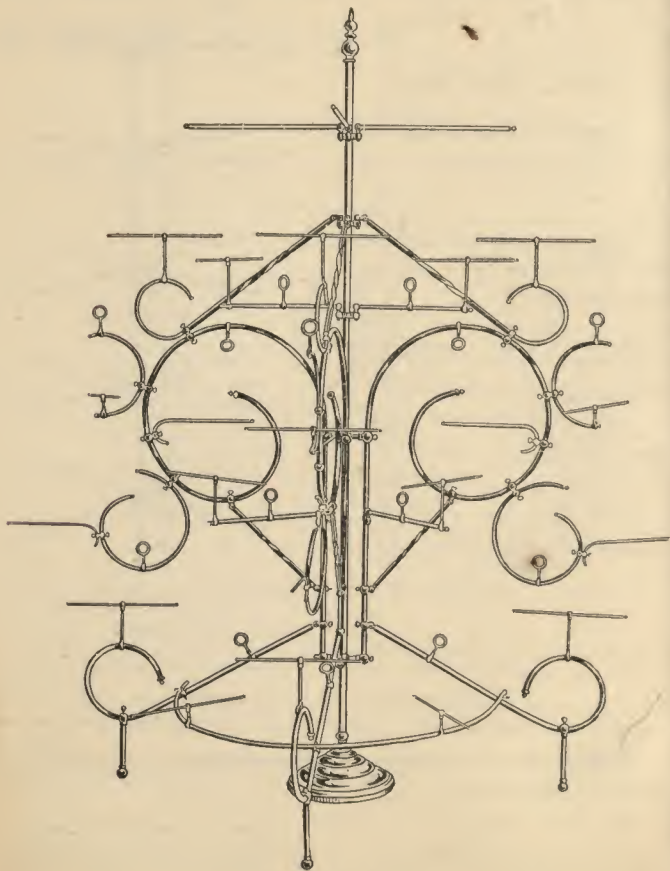

No. 361.

NOTE:—Prices quoted are for Finest Nickel Finish or Polished and Lacquered Brass.

We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass when desired, at an additional cost of 10 per cent.

In all cases Nickel will be sent unless otherwise ordered.

No. 130.

Large Window Frame.

No. 130, Fancy Window Frame.

This fixture affords so many opportunities for adjustment, variety of arrangement and kind of attachments that may be suitably used, that it will be appreciated by any who have a wide range of goods to show.

To those looking for an entirely new and novel window frame, we recommend this fixture.

The Brackets and Arms are adjustable on the standard. The Half Circles and Open Circles slide through sockets adjustable on the middle brackets. There is hardly a part of this fixture that is not adjustable or that may not be entirely removed and its place supplied by some other attachment.

It is supplied with the following attachments: Swing Arms, Cross Rods and Tie Rings. Many other attachments may be used with equal effect for displaying a great variety of articles. We suggest,

Nickel Tops, No. 325, See Page 60,

Hat Supports, No. 26, See Page 85,

Flower Holders, No. 320, See Page 84,

and others that will meet the ideas of the artistic window decorator will be found catalogued in these pages.

A very handsome trim may be made with ladies' shoes, by using our No. 103 Shoe Clip. See page 101 for description.

Artistic trims may be made with any goods of a light nature. A line of gloves and neckwear may be displayed with striking effect.

No. 130, Description and Dimensions.

Base, 13 inches diameter.

Standard, $1\frac{1}{2}$ inches diameter.

Three each, Upper, Middle and Lower Brackets, $\frac{5}{8}$ inch diameter.

Three each, Half Circles and Open Circles, $\frac{5}{8}$ inch diam.

Three Straight Swing Arms at top, $\frac{1}{2}$ inch diameter, 18 inches long.

Four Straight Swing Arms below, $\frac{1}{2}$ inch diameter, 18 inches long.

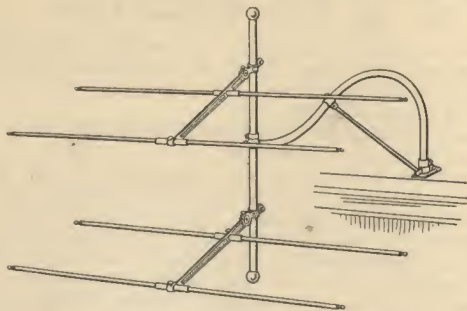

Six Curved Swing Arms, $\frac{1}{2}$ inch diameter, 12 inches long.

Fifteen Cross Rods, with Clamps $\frac{1}{4}$ inch diameter, 14 inches long.

Sixteen Tie Rings with Clamps.

Height, 7 feet 6 inches.

No. 130. Price, Including All of Above, \$75.00.

114 No. 114, Cornice Fixture.

The importance of display over counter is not sufficiently appreciated. It is the most available and the most valuable fixture space inside your store.

The correct location of fixture is important, if you would secure the greatest good from your display.

The height is the first consideration, and the second is to place trim as far back over the counter as convenient, so customers will not have to look directly up at goods.

In locating our Cornice Fixture the ball on the end of bracket should be about 7 feet 6 inches from floor. When so placed, the adjustment of 12 inches or more secured by sliding the upright, allows trim to be placed at height suitable for the class of goods shown.

Distance from shelving can be varied to suit your counter and other conditions by location of flange on top of shelving.

For extra wide aisles special brackets will be furnished at slight additional cost. The reach of our most commonly used bracket is 30 inches. In ordering, two dimensions should always be given, viz:

First—Distance from floor to top of shelving where flange will be secured.

Second—Distance from front of shelving to back of counter.

No. 114, Cornice Fixture.

The Fixture shown on opposite page places goods in an attractive manner, where customer cannot help seeing the articles displayed.

THE BARLOW No. 114 is the most practical and thoroughly satisfactory Cornice Fixture in use to-day.

In it are included all the adjustments possible in this class of fixture, at the same time it will keep its shape, being strong, stiff and well made.

The Bracket is fastened to shelving back of cornice by heavy iron flange extending back 8 inches, and with deep socket for bracket giving ample support. It is braced by an adjustable hinged rod.

Upright supporting Ratchet Arms slides through ball at end of bracket and may be raised or lowered, thumb screw in ball holding it firmly at desired height.

Barlow Patent Ratchet Arms are adjustable on upright both for height and angle. For description of Ratchet see pages 12 and 13. These Arms are not notched, but the cross rods slide through long sleeves firmly fastened in arms, keeping rods in line.

The entire fixture may be swung from the back, or each section of rods may be swung independently of the other.

The whole construction is stiff and substantial, at the same time light and graceful

BRACKET, $\frac{7}{8}$ inch diameter,

HINGED BRACE, $\frac{1}{2}$ inch diameter.

UPRIGHT, $\frac{7}{8}$ inch diameter, 24 inches long.

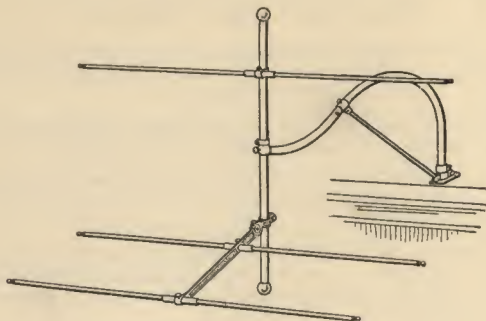

HORIZONTAL RODS, $\frac{1}{2}$ inch diameter, 4 feet long.

No. 114, Price \$7.50 Each.

WE GUARANTEE

All of our fixtures to be strong and stiff enough to do the work for which they are designed and recommended.

We will replace without charge any parts which prove defective in material, workmanship or finish.

No. 349.

Cornice Fixture, similar to 114 (see page 26) except with three rods. Dimensions of stock used and range of adjustment like No. 114.

We recommend this fixture where variety of arrangement is desired.

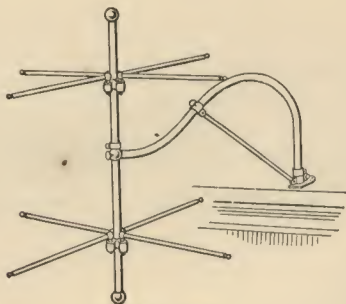

No. 349, Price \$7.00 Each.

When arranged as a Ceiling Fixture, with pendant six feet long (see No. 362, page 31) horizontal rods four feet long.

No. 365, Price \$6.50 Each.

Orders will be Filled Promptly.

We carry a large stock of finished work constantly on hand, and are prepared to make prompt shipment.

No. 350.

Cornice Fixture.

Bend and Upright, same construction as No. 114. (See page 26.)

SWING ARMS, $\frac{1}{2}$ in. diameter, 18 inches long, may be raised or lowered on upright.

No. 350, Price \$7.50 each.

Cornice Fixture same as above, except with SWING ARMS $\frac{1}{4}$ in. diameter, 12 in. long.

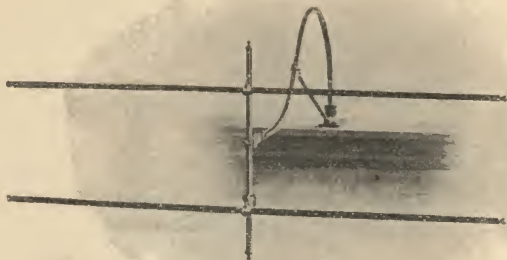

No. 364, Price \$6.00 each.

When arranged as Ceiling Fixtures, with UPRIGHT 6 feet long (see No. 362 page 31.)

No. 366, with Swing Arms $\frac{1}{2}$ in. by 18 in., Price **\$7.00.**

No. 367, " " " $\frac{1}{4}$ " " 12 " " **5.50.**

Write for Discounts.

No. 351.

Cornice Fixture.

Bracket is fastened to shelving back of cornice by heavy iron flanges extending back 8 inches, and with deep socket for bracket, giving ample support for same. Bracket is further braced from flange to bend by adjustable rod.

The upright which carries the two horizontal rods is attached to brackets with a ratchet joint, which is easily adjusted, and will not slip, as is frequently the case with a friction joint. This joint enables you to set upright at an angle. This prevents goods displayed on upper from hanging directly over goods on lower horizontal rod

Horizontal rods slide through right angle collars, which may be raised or lowered on upright.

Whole fixture may be swung in flange, enabling you to have display face in any desired direction.

BRACKETS, $\frac{7}{8}$ inch diameter.

ADJUSTABLE BRACE, $\frac{1}{2}$ inch diameter.

UPRIGHT, $\frac{7}{8}$ inch diameter.

HORIZONTAL RODS, $\frac{1}{2}$ inch diameter, 4 ft. long.

No. 351, Price \$5.00 Each.

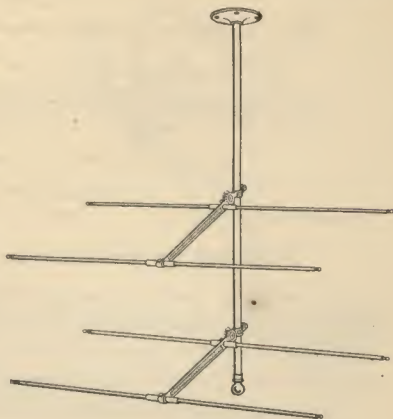

When arranged as a Ceiling Fixture, with upright six feet long (see No. 362, page 31) Horizontal Rods four feet long.

No. 368, Ceiling Fixture, Price \$4.00.

Ceiling Fixture

To hang over Counter or
Show Case.

It is not always possible to have a fixture supported from a Cornice for reasons such as light wood work or very high shelving. For such conditions we recommend this fixture, provided ceiling is not too high, say not over 12 to 14 feet.

No. 362

PENDANT, $\frac{7}{8}$ in. tubing, 6 feet long, fastened to ceiling with heavy flange.

RATCHET ARMS supporting $\frac{1}{2}$ in. diameter rods 4 feet long. The Arms may be placed at any angle and rods may be made to face any desired approach.

No. 362, Price \$7.00 each.

WE GUARANTEE

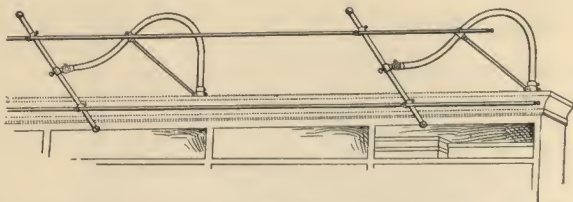

Material in all our fixtures to be the best. High Grade Brass Castings, Hard Drawn Brass Tubing or Heavy Steel Lined Brass Tubing.

No iron or steel used except where required for weight or as noted.

Workmanship First Class in every respect.

Finish unexcelled.

Write for Discounts.

No. 14.

Running or Continuous Cornice Fixture.

Brackets are fastened to cornice by heavy iron flanges and are substantially braced. The upright or rod which carries the two running rods is fastened to bracket with a RATCHET joint, which is easily adjusted and will not slip (as is frequently the case with a friction joint).

This joint enables you to have horizontal rods on an angle when desired. Upright or supporting rod, slides through ball and may be raised or lowered. Each supporting rod is equipped with two rod hook slides which may be raised or lowered.

In ordering give measurement from top of cornice to floor, and from shelving to back of counter.

Brackets should be placed from 4 feet to 6 feet apart, depending upon the weight of goods to be shown.

PRICES.

No. 14. Bracket, Supporting Rod and Two Rod Hook Slides,
\$4.50 Each.

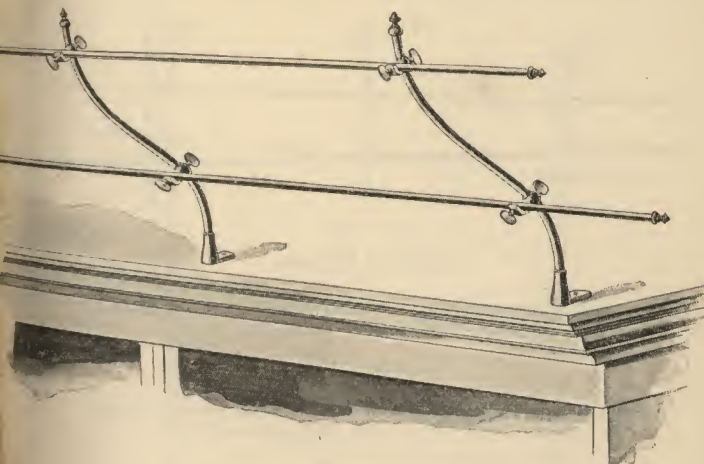

Rods, $\frac{1}{2}$ inch diameter tube, 12c. Per Foot.

Rods, $\frac{5}{8}$ inch diameter tube, 17c. per Foot.

WE GUARANTEE

All of our fixtures to be strong and stiff enough to do the work for which they are designed and recommended.

We will replace without charge any parts which prove defective in material, workmanship or finish.

No. 16.

Cornice Fixture.

Designed for Top of Low Shelving.

It is well adapted for narrow stores, as the goods displayed will not hang out into the store as far as with fixtures like No. 14. (See page 32.)

CURVED SUPPORTS, $\frac{1}{2}$ inch diameter.

HEIGHT, from top of shelving to tip, 24 inches.

RODS, $\frac{1}{2}$ inch diameter.

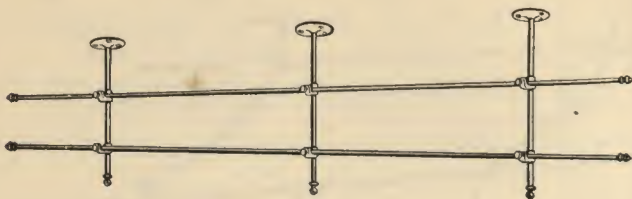

PRICES:

Supports, Including Two Rod Hook Slides, \$1.25 Each.
Rod, $\frac{1}{2}$ Inch Diameter, 12c. Per Foot.

Note.—Prices quoted are for Finest Nickel Finish, or Polished and Lacquered Brass.

We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass, when desired, at an additional cost of 10 per cent.

In all cases Nickel will be sent unless otherwise ordered.

No. 19.
Ceiling Fixture.

Pendant $7\frac{1}{4}$ inch diameter, 5 feet long, with Two Rod Hook Slides and Thumb Screws. **Price, \$2.75 Each.**

No. 111.

A very neat, handy and inexpensive method of making an attractive display. It is much used in windows and store interiors. Can be used with as many or as few rods as desired.

Price of Chain, 15c. Per Yd. or \$1.50 Per Dozen Yds.

" " Rod Hooks, 20c. Per Dozen.

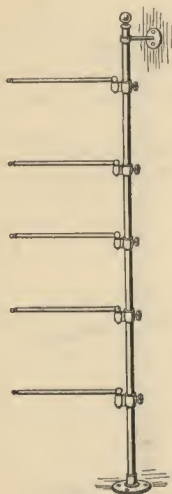

" " Ceiling Hooks, 30c. Per Dozen.

" " $\frac{1}{2}$ Inch Rods, 12c. Per Foot, including the Ball Ornament at each end.

Note.—All prices quoted are for Finest Nickel Finish, or for Polished and Lacquered Brass.

We will furnish Black Nickel, Copper, Oxidized Copper, Oxidized Brass or Antique Brass when desired, at an additional cost of 10 per cent.

In all cases Nickel Finish will be sent unless otherwise ordered.

No. 21.

Side and Corner Standards with Swinging Arms, used in windows, give most advantageous display at points not otherwise available. One, two, three or four arms may be used in each section, and four or more sections, to best suit the space. Very attractive displays can be made by judicious arrangement.

Standards of $\frac{3}{4}$ inch steel lined brass tubing with floor flanges of cast brass, top ornament of cast brass and braces of brass tube any length to 12 inches, in even inches.

Prices of Standards complete as above, but not including Arms:

Length 5 Feet, \$3.00 ; 6 Feet, \$3.30 ; 7 Feet, \$3.60 ; 8 Feet, \$3.90 ; 9 Feet, \$4.20.

For prices of Arms see opposite page. Slides for Standards will be substituted for Wall Sockets, and will be furnished at prices as listed if so ordered.

For those customers who have Arms which they wish to put to a new use, we offer Wall Sockets and Slide Sockets at prices below. In ordering, unless the Arms are of our make, sample should be sent so that hole will be of right size to take the spindle of Arm.

NUMBERS AND PRICES FOR WALL SOCKETS.

A New Departure in Window or Counter Trees.

No. 127.

The Barlow Numbers 126, 127, 135 and 174, are the most attractive and effective trees ever offered.

They are very substantial and will carry heavy trimming. They have a wide range of adjustment for a stand so simple and inexpensive.

The Bases and Standards are heavy. The Half Circle Brackets slide in sockets, so the width of the Fixture and shape of the completed trim may be varied.

These brackets and straight arms may be raised or lowered on the standard.

BASE, $7\frac{1}{2}$ inches diam.
STANDARD, $\frac{5}{8}$ inch diameter.

HALF CIRCLE BRACKET, $\frac{3}{8}$ inch diameter, rope tubing.

CROSS RODS, $\frac{1}{4}$ inch diameter, 14 inches long.

STRAIGHT ARMS, $\frac{1}{4}$ inch diam'tr, 9 inches long.

HEIGHT, 3 ft. 6 inches. Spread, 30 inches. Adjustable.

No. 127, Price \$7.00 Each.

No. 126—Same as No. 127, except with two Half Circle Brackets, instead of three, and four Cross Rods instead of six.

No. 126, Price \$6.00 Each.

No. 174—Same design as No. 127, but made of lighter material, and consequently desirable for less heavy trimming.

BASE, 6 inches diameter.

STANDARD, $\frac{1}{2}$ inch diameter.

HALF CIRCLE BRACKETS $\frac{1}{4}$ inch diameter, plain rod.

CROSS RODS, $\frac{3}{16}$ inch diameter, 14 inches long.

STRAIGHT ARMS, $\frac{3}{16}$ inch diameter, 9 inches long.

HEIGHT, 3 ft. 6 inches. Spread, 30 inches.

No. 21.

Side and Corner Standards with Swinging Arms, used in windows, give most advantageous display at points not otherwise available. One, two, three or four Arms may be used in each section and four or more sections, to best suit the space. Very attractive displays can be made by judicious arrangement.

Standards of $\frac{3}{4}$ inch steel lined brass tubing, with floor flanges of cast brass; top ornament of cast brass and braces of brass tube any length to 12 inches, in even inches.

Prices of Standards, complete as above, but not including Arms:

Length 5 feet \$3.00, 6 feet \$3.30, 7 feet \$3.60, 8 feet \$3.90, 9 feet \$4.20.

For prices of Arms see page 37. Slides for standards will be substituted for Wall Sockets and will be furnished at prices listed, if so ordered.

For those customers who have Arms which they wish to put to a new use, we offer Wall Sockets and Slide Sockets without the Arms. See price list on page 36.

No. 194.
Garment Bracket.

Strong and stiff enough to hold heavy Coats or Cloaks. End of Arm is Cast Brass, Double Hook. Length 9 inches. May be used on wall as shown, or on Standard, like No. 21 above. Sockets furnished for either at price stated, but unless otherwise ordered Wall Socket will be sent.

No. 194, Price \$10.00 per Doz.

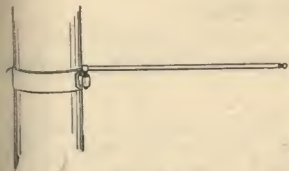

No. 195.

Tie Ring for End of
Bracket.

A Tie displayed through ring on the end of Arm gives finished appearance to your trim. Can be applied to any of our $\frac{1}{2}$ inch diameter Arms and removed at pleasure. It slides on end of Arm.

No. 195, Price, Ring Only,
\$2.75 per Dozen.

No. 199.

Cloak and Suit Reels.

Will easily carry forty or more garments.
Customers may inspect and select without
disarranging your entire stock.

Saves valuable time.

Keeps garments in better shape than can
be done in any other way and requires much
less space than any other method.

Reel revolves easily, smoothly and quietly.

A very strong, durable and ornamental
reel.

BASE, 31 inches diameter, Cast Iron, having
Casters with Ball Bearings.

STANDARD, $1\frac{1}{2}$ inches diameter, heavy re-
inforced tubing.

REEL, 30 inches diameter.

HEIGHT of Reel from floor, 5 feet 4 inches.

Finish unless otherwise ordered will be:
Japanned Base, Nickel Plated Standard and
Reel. If preferred will furnish Silver
Bronzed Base, Nickel Plated Standard and
Reel or Coppered Base and Oxidized Cop-
per Standard and Reel.

No. 199, Price \$15.00 Each.

Post Circles for Coats.

They do not revolve but will hold forty or more garments.

Have double band to fit post and braces from bands to circles.

Diameter of circle 30 inches. To fit any post not over 10 inches diameter.

In ordering give exact CIRCUMFERENCE of post at point where circle is to
be placed.

No. 385, Price \$10.00 Each.

Prices for circles to fit larger posts will be sent upon application.
See page 75 for prices of Coat Hangers.

Double Coat Reels.

Has advantages over single reel which will be appreciated by the wide-awake merchant.

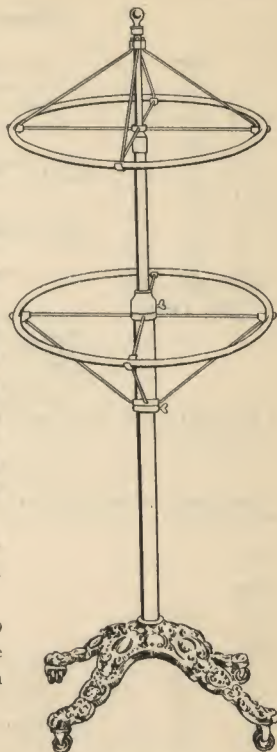

Particularly designed for short coats, jackets and for childrens' clothing. With extensible Standard.

The lower portion of Standard has an inner nut with a long screw attached to upper part of standard by which the height of fixture may be extended to 16 inches and the distance between the two reels varied to suit garments of various lengths for the styles of different seasons or a variety of stock to be shown. Each reel revolves independently and the bracing of the lower being on the under side. The upper reel is not hindered or disarranged by that below.

The dimensions of No. 374 are same as No. 199, except that lower half of standard is 2 inches diameter.

Height of upper circle is from 64 to 79 inches above floor. Lower circle may be set 60 inches or less from floor. Finish same as No. 199.

No. 374. Price \$25.00 Each.

No. 374.

Double Coat Reel Without Extensible Standard.

This reel has standard 2 inches diameter. Height from floor to upper reel 71 inches. Lower reel may be set at any height. Bracing on lower reel is on under side. Finish same as No. 199.

No. 384, Price \$22.00 Each.

WE GUARANTEE

All of our fixtures to be strong and stiff enough to do the work for which they are designed and recommended.

We will replace without charge any parts which prove defective in material, workmanship or finish.

Plate Glass Shelving.

For the convenience of customers who may wish to replace broken glass or to add sizes not already in use, we present the following lists at which glass plates and mirrors of the various sizes shown in these pages will be furnished.

We do not solicit orders for glass, as the risk of handling and carrying it in stock is considerable; but as many of the plates are of special sizes or have holes for standards, they are purchased at more reasonable prices when ordered in large quantities. We give you the benefit which we have in this particular.

NOTE.—We, in common with all shippers of glass, do not assume any risk of breakage in transportation.
